

# The NATURE'S BIOTICS® Formula III System

## NATURE'S BIOTICS® *SBO Advanced Probiotic Formula*

### **INGREDIENTS:**

*Lactobacillus Acidophilus, Bifobacterium Bifidum, Bacillus Licheniformis, Bacillus Subtilis, Lactobacillus Lactis, Lactobacillus Casei, Lactobacillus Fermentum and Lactobacillus Plantarum. Proprietary formula of SBOs™ (Soil Based Organisms) symbiotically blended in a nutrient rich host medium.*

### **SUGGESTED USE:**

*To assist the body in regulating the balance between friendly and unfriendly bacteria, and to help restore optimal immune responses, start by taking one capsule daily, 30 minutes before a meal with 6-8 ounces of water. Each week add another capsule daily until you are taking 6 a day. Continue this dosage for 4 to 6 months, then drop to 3 capsules a day for life.*

**CAUTION:** As with any dietary supplement consult your healthcare practitioner before using NATURE'S BIOTICS®. It is not recommended for use if you are pregnant, nursing, or under medical supervision.

These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure, or prevent any disease.

Medical experts now assert that inadequate levels of beneficial intestinal microorganisms are directly associated with the following ill-health conditions: Bloating, Constipation, Frequent Diarrhea, Environmental Allergies, Poor Immune Response to modern Day Illnesses, Heartburn, High Cholesterol, Hormonal Imbalance, Low Libido, Menstrual Cramps, Sinusitis, and Candida, among others.

Today, with "nutrient-depleted soil conditions" and the over-use of chemicals, fungicides, and herbicides these friendly soil-based organisms are rapidly disappearing from our food supply. With the decline of SBO's in the soil, contagions destroy our internal digestive system and rob the body of natural digestive nutrients that are essential to maintaining good health. Additionally, as the body ages, enzymes and other digestive substances naturally decrease in amount and productivity levels.

NATURE'S BIOTICS® (the oldest known formula of SBO's) has been sold as a dietary

supplement for 25 years to help reduce toxins in your digestive system, restore friendly bacteria, and work to assist your body to assimilate essential nutritive elements that help promote optimal immune function.

In the late 1970's, American research scientist Peter Daubner began conducting studies on huge colonies of soil-based organisms (SBOs). Daubner's three-phase studies allowed him to identify and distinguish a process for selectively breeding superior strains of these SBOs. Through his research he was able to establish that these soil-based organisms produced very specific immune system responses, with no toxic side effects. Thus leading to the formulation of the first SBO product to hit the US marketplace, our exclusive flagship product – NATURE'S BIOTICS®.

## How Are SBOs Different From Other Probiotics?

There is a powerful distinction between SBOs (Soil Based Organisms) and the popular probiotics on the market today. Although SBOs are in the same category as other probiotics, consuming the typical probiotics without the SBOs would be like playing football without a quarterback. The bacteria found in the usual probiotics are endogenous, meaning these bacteria are naturally occurring in the body.

Whereas, the SBOs in NATURE'S BIOTICS® are not endogenous to the body. Soil Based

Organisms are non-toxic, friendly, FOREIGN bacteria. As foreign agents, they act as a catalyst for the body to help produce its own natural antibodies which are non-specific and stand readily available to help defend the body against other dangerous unfriendly invaders.

# What Are SBO's?

## (Soil Based Organisms)

**SBO's** are beneficial soil bacteria that were a normal part of our diet until the end of the 19<sup>th</sup> century. Around that time, the introduction of pesticides, chemicals, and food processing diminished the daily "farm to table" ingestion of raw fruit and vegetables containing these SBO's. When ingested as a natural part of our daily food source, these friendly organisms acted as a buffer to safeguard the natural intestinal flora (friendly bacteria.) They produced benefits in the body, such as the natural production of our own antibodies, improved digestion, greater absorption of nutrients, and most importantly, they worked to rid the body of disease causing pathogens (disease causing organisms) and other deadly toxins.

The **NATURE'S BIOTICS SBO/Probiotic** blend present in our **CHILDREN'S Formula**, functions in a very similar fashion as in nature. This proprietary blend is unique, in that at the point of culturing, these vital organisms are rendered into a "**State of Dormancy.**" Through our revolutionary technology and the support of a substrate of "**life sustaining**" nutrients which include a full spectrum of vitamins, minerals and trace elements, these organisms are protected and nourished until activated with an aqueous solution, such as juice or water. Once ingested, these **friendly microbes multiply into billions of colonizing organisms** and begin to populate along the entire intestinal tract, working to rid the body of disease causing pathogens and other toxins. Because of this special technology, **NATURE'S BIOTICS CHILDREN'S SBO/Probiotic** blend can be kept at room temperature; it does not require refrigeration and has a 5-year shelf life.

### Some of the benefits of friendly Soil Based Organisms are:

- SBO's produce specific proteins that act as antigens. These antigens help to stimulate and strengthen the immune system by producing a reserve of natural antibodies that are un-coded and stand ready to defend the body against unfriendly invaders.
- SBO's are extremely effective in supporting the body in its fight against pathological molds, yeast, fungi, and viruses.
- SBO's produce a potent antioxidant enzyme called "**Super Oxide Dismutase**" that acts as a super scavenger to defend against free radicals (free radicals will attack any molecule in the body creating organ and tissue damage.)

### How Are SBO/Probiotics Different From Other Probiotic Products?

There is a powerful distinction between SBOs (Soil Based Organisms) and other popular probiotics on the market today. Although SBOs fall under the same probiotic category, consuming typical probiotics without the SBOs would be like playing football without a quarterback. The bacteria found in the usual probiotics are endogenous, meaning these bacteria are naturally occurring in the body, whereas, the SBOs in **NATURE'S BIOTICS® CHILDREN'S SBO/Probiotic Formula** are not endogenous to the body. They are non-toxic, friendly, **FOREIGN** bacteria, which act as a catalyst for the body to help produce its own natural antibodies which are non-specific and stand readily available to help defend the body against dangerous unfriendly invaders.

For optimal health benefits, we recommend the **NATURE'S BIOTICS Formula III, PLUS™** products including; **Aloe PURE™** for cleansing, **pH PERFECT™** for acid/alkaline balancing, **NATURE'S BIOTICS** for intestinal health and daily production of your own natural antibodies, and **LIFE'S GREEN ESSENTIAS™ Enhanced with SBO's** for the ultimate whole food nutritional support.
